Israt Rayhan (Autor)

Assessing Household Vulnerability and Coping Strategies to Floods:

A Comparative Study of Flooded and Non-flooded Areas in Bangladesh, 2005

1. Introduction 1
    1.1 Problem Statement 2
    1.2 Research Objectives and Questions 4
    1.3 Outline of this Study 5
2. Literature Review: Theoretical and Empirical 6
    2.1 Vulnerability Concept from Economics Literature 6
        2.1.1 Poverty Dynamics Literature 6
        2.1.2 Asset-based Literature 12
        2.1.3 Livelihoods Literature 13
        2.1.4 Food Security Literature 14
    2.2 Vulnerability Concept from Non-economics Literature 14
        2.2.1 Sociology and Anthropology Literature 15
        2.2.2 Disaster Management Literature 15
        2.2.3 Environment Literature 16
        2.2.4 Health and Nutrition Literature 16
    2.3 Assessment of Literature from Different Disciplines 17
    2.4 Summary and Conclusion 18
3. Conceptual Framework and Methodology 19
    3.1 Conceptual Framework: Poverty, Risk and Vulnerability 19
        3.1.1 Risk and Uncertainty 23
        3.1.2 Utility Function and Risk Aversion 23
    3.2 Indicators of Vulnerability to Flood Risk 28
    3.3 Methodologies for Estimating Vulnerability 32
        3.3.1 Vulnerability to Poverty Line 32
        3.3.2 Vulnerability to Expected Poverty 36
        3.3.3 Vulnerability to Expected Utility 43
        3.3.4 Vulnerability Estimate using Monte Carlo Bootstrap Simulation 46
        3.3.5 Poverty Line 50
    3.4 Summary and Conclusion 51
4. Case Study: Bangladesh, Survey Area Profiles and Descriptive Analysis 56
    4.1 Country Background: Bangladesh 56
        4.1.1 Topography of Bangladesh 56
        4.1.2 Patterns and Types of Floods 58
        4.1.3 Some Statistics on Rural Bangladesh 61

4.2 Profile of Survey Areas 61
4.3 Sampling Design: Quantitative and Qualitative Data Collection 63
4.4 Exploring Data and Checking Assumptions 66
4.4.1 Randomness of Sample 66
4.4.2 Normality Test 67
4.4.3 Detection of Outliers 68
4.5 Descriptive Analysis of Sample Households 70
4.5.1 Socioeconomic Profiles of Sample Households 70
4.5.2 Distribution of Households in Different Income Sources 73
4.5.3 Flood Severity and Transition of Poverty 75
4.6 Summary 77
5. Econometric Modeling of Poverty and Vulnerability 79
5.1 Determinants of Households' Income: Multivariate Regression Analysis 79
5.2 Determinants of Poverty to Floods: Multinomial Logit Model Approach 88
5.3 Interpreting Vulnerability Estimates 92
5.3.1 Vulnerability to Poverty Line Estimates 93
5.3.2 Vulnerability to Expected Poverty Estimates 96
5.3.3 Vulnerability to Expected Utility Estimates 99
5.3.4 Vulnerability Estimates from Monte Carlo Bootstrap Approach 103
5.3.5 Comparing Vulnerability Estimates from Four Methodologies 106
5.4 Summary 108
6. Coping with Floods 110
6.1 Coping Strategies of Flooded Households 110
6.2 Diversification as Coping Strategy 117
6.2.1 Crop Diversification 118
6.2.2 Income Diversification 121
6.3 Migration as Coping Strategy 124
6.3.1 Synopsis of Migrants 124
6.3.2 Social Network and Migration 126
6.3.3 Vulnerability and Consequences of Migration 127
6.4 Summary 128
7. Summary and Conclusion 129
7.1 Policy Recommendation 137
7.2 Scope for Further Research 138
